Federal (FED)

- FE = Federally listed; Endangered
- FT = Federally listed; Threatened
- SC = Federal Species of Concern; not an active term, and is provided for informational purposes only.
- FPE = Federally Proposed for Listing as Endangered
- FPT = Federally Proposed for Listing as Threatened
- FC = Federal candidate species (former Category 1 candidates)

State

- ST = State listed; Threatened
- SE = State listed; Endangered
- FP = Fully protected under the *California Endangered Species Act*
- SA = State Special Animal
- SC = California Species of Special Concern

California Native Plant Society (CNPS) designations analyzed

- List 1A: Plants presumed extinct in California
- List 1B: Plants rare and endangered in California and throughout their range
- List 2: Plants rare, threatened or endangered in California but more common elsewhere in their range.

- * ■ Taxa that are biologically rare, very restricted in distribution, declining throughout their range, or at a critical stage in their life cycle when residing in California.
- Population(s) in California that may be peripheral to the major portion of a taxon's range, but which are threatened with extirpation within California.
- Taxa closely associated with a habitat that is declining in California (e.g., wetland, riparian, old growth forest).
